

Certifiable ISMS for all types of organizations

Basic protection against threats, regardless of sector or company size.

ISO 27001 helps organizations to establish appropriate security management. It supports the introduction and continuous improvement of control mechanisms to effectively protect sensitive information and systems.

Consileon is your partner along the entire ISO 27001 certification process.

Our approach:

Prepare and enable your certification.

- Information security status check
- Training of project team and coaching of safety officers
- Selection of suitable tools for your workflows
- Support with initial implementation or version updates
- Smooth establishment of the system in day-to-day work
- Internal pre-audit to prepare for certification

Result and customer benefit:

Customized, certifiable ISMS.

- Assessment of information security in your company
- Established internal security organization
- Training certificates for participating parties
- Information security risk management
- Pre-audit report and action plan (ready-for-certification)
- Foundation for a state-of-the-art, powerful and secure IT

Our expert for all your cybersecurity needs.
